

**Timberland Regional Library
Facilities Committee
Minutes
March 6, 2012
11:30 a.m.**

Members Present: John Braun (phone), Emmett O'Connell (phone), and Judy Weaver

Staff Present: Gwen Culp, Sally Nash, Brenda Lane, Jeff Kleingartner, and Rick Homchick

Study Session:

Gwen Culp, acting Director, reviewed the agenda, briefly reviewed the issues to be addressed by the Facilities Committee, including an update of the Facilities Plan, and asked for thoughts on the scope of the agenda. Trustee Braun expressed his concern about the scope of a complete Facilities Plan update and suggested that we break facilities planning into 3 parts:

- Intermediate maintenance and ADA upgrades (priority 1).
- Services and operational maintenance; including evaluation and guidance within TRL policy for provision of TRL financial support of maintenance and janitorial services in the city owned-buildings (priority 2).
- Long-term Facilities Plan (priority 3).

Intermediate Maintenance and ADA Upgrades:

Intermediate maintenance and ADA upgrades are year-to-year projects that are necessary. These projects are budgeted and scheduled annually for TRL owned buildings. The TRL Facilities Department has done an ADA assessment of the physical space in TRL buildings (includes sidewalks, aisles, shelving, restrooms, work surface heights, etc., but not audio systems, computer systems, etc.). After TRL buildings are updated, the Facilities Department will do a similar assessment of city-owned buildings although TRL would only be responsible for aspects inside the building, such as layout and furnishings. Changes to the building or exterior such as sidewalks would be the responsibility of the cities. A request was made to go back to the 2002-2014 Planned Capital Building, Remodeling and Maintenance Report for all libraries and provide an update.

Services and Operational Maintenance:

There has been discussion over the last couple of years about TRL providing some level of funding to cities for janitorial service and maintenance projects. An understanding is needed on how this money would be used and the long-term costs of a commitment to this type of funding for city-owned buildings. This topic was discussed by the Board several times in the context of the Yelm agreement, i.e., whether the Yelm agreement was precedent setting and whether similar assistance to other cities was affordable long term for TRL. TRL's interest in supporting the cities for maintenance and janitorial services needs to be addressed in policy. The current facilities agreements with cities state that the cities are responsible for janitorial services and building maintenance so these agreements would also need to be considered.

Long-term Facilities Plan:

The long-term facilities planning should include a process for discovering areas in the District that are underserved and existing facilities that are lacking. It should define a TRL service model with varying levels of service depending on the needs and profile of the community; and criteria, such as population, distance from other service points, etc., for deciding when and where new service points should be located.

Other:

- A request was made to provide an update on current projects along with detail of how much money has been spent and the expectations of TRL going forward. Trustee Braun is concerned that we have not yet properly evaluated and measured current projects against a common criterion for the District. Trustee O'Connell voiced concern over the appearance of TRL braking momentum on projects. Trustee Weaver also voiced concern over TRL's taking a lead on any projects at present.
- A request was made to evaluate the bid and contracting process and establish procedures and documentation requirements.
- A request was made to receive notification of Morton's intent to annex with TRL.

Staff Task List:

- Provide for the full Board of Trustees an update of current projects along with expectations from outside parties in dollars and time. Also, provide estimate of long-term operational expenses. Get direction from Board on how to proceed.
- Update the detail for TRL's intermediate maintenance plan, along with TRL's ADA assessments, for full Facilities Committee by April or May.
- Provide an understanding and the long-term commitments for TRL's interest in providing support for the cities' facility services and operational maintenance as an agenda item for the next Facilities Committee.
- Long-term facilities planning, evaluation criterion and modeling, as an on-going Facilities Committee discussion with report to full Board by later this year or next.
- Provide background information on TRL's bid and contracting process as an agenda item for next Facilities Committee meeting; establish procedures and documentation requirement in the next six months with report to full Board.
