MINUTES

Members present: John Braun via phone, Judy Weaver via phone, Gwen Culp, Rick Homchick, and Brenda Lane, recorder.

Members absent: Emmett O'Connell

1. Review Current Status of Allocations for City Owned Buildings:

John stated that is hard to understand the sustainability of the concept and that good guidance on how the funds could be used has not been provided. He would like to see the creation of a process for annual review of building allocations requests as part of the budget process with guidelines developed on how the funds could be spent. Gwen agreed that it needs to be part of the budget and planning process. John would also like to explore possible standards to be applied to janitorial and security services provided in all the buildings.

After a short discussion, it was recommended that we not take on a broad, year- to-year allocation for city-owned buildings. Instead we should work through the budget and planning process procedures for application, review and rating of possible projects for city owned buildings.

Action: Staff will develop a process for allocation, a planning document, application and award process, and a timeline for submissions to fit in our budget/planning cycle.

2. Emerging, Unanticipated Costs for Buildings

Gwen outlined the examples of current unanticipated costs for buildings that have been requested. Rick stated that since we added the city building fund allocations in 2012, we did not include a line item in the budget for 2012 for unanticipated costs which were previously recorded as contingencies. John suggested that we create a line item in the budget for unanticipated costs for 2013. Judy agreed that this should be considered as part of the budget planning process with submission and approval.

3. Review Capital Facilities Plan 2002-2014

Gwen reported that staff have updated the 2002-2014 plan to reflect completed projects as well as new short and long term projects. It is an extensive but not comprehensive project list. It was agreed that the Committee didn't need to review the list in the meeting. Staff intends to develop procedures for keeping the plan up-to-date.

4. Review Cost Estimate for Ocean Park Expansion

Gwen reported that Frank Densmore, architect on the Ocean Park project, has indicated that the original estimate is low in terms of the total project cost because it did not include carpeting, painting, and electrical in the current structure, complete shelving and furnishings, and additional engineering fees. He stated that if the Board approves the project moving forward, it should take

about a month to go out to bid and that framing should start by July 2012. Rick said that the new estimate provided to the Committee includes additional shelving and furnishing which were not included in the initial cost estimate. The current estimate for the Ocean Park project is approximately \$800,000.

Gwen noted that the Building Fund Policy states that the Building Fund pays for building, maintaining and/or remodeling of TRL-owned library facilities, which is consistent with past practice. John said that he supported TRL paying for the remodeling project but still would like to have the Friends group participate in some costs. Judy asked if the Building Fund can support the \$800K expenditure. Rick stated that there would be approximately \$500,000 in the Building Fund after the Ocean Park project and other expenditures planned for 2012.

John said that he believes we have made a commitment to the project and sees it as a priority. He believes that we need to live within the current economy and spend only to a certain limit, but that now is a good time to go out for bid. He supports recommending to the Board that we move forward with the project and would be comfortable recommending a spending limit of \$600-700K for the project, with the Friends of the Library contributing to fill in the gap.

The Committee agreed that Gwen should contact Frank Densmore to work on the bid process with the understanding that the project does not have full Board approval at this date.

Action: The Facilities Committee will recommend to the Board of Trustees at the April Board meeting that they approve and fund \$600-700K toward the Ocean Park Expansion Project.

5. Oakville Project Management

After some background discussion on where the project began and where it is currently, discussion turned to project management and TRL responsibilities for the Oakville project. John stated that it is not our mission or our responsibility to lead this project. Historically Timberland does not take the lead on building projects in cities. We have announced our support for this project, but cannot fundraise or provide staff or funds for the building. He recommends that Timberland draft a letter for the President of the Board of Trustees to sign that outlines what TRL has done, what we can do, and what our position is moving forward. He would like to be on record that we support the project, but cannot lead the management of it.

Action: Staff will draft a letter for Board review at the April meeting that will outline our position with the project. It will then be sent to the appropriate parties.
